institute@arendt.com +352 40 78 78 558 ESG - From CSRD and EU Taxonomy: how EU regulations affect non-financial reporting for financial market participants

Objective

Our ESG regulatory experts team up with **the Luxembourg Stock Exchange (LuxSE**) to share their longstanding experience in SFDR and Taxonomy compliance support within the financial services sector.

The session will give you the opportunity to:

- Get fresh combined perspectives on the EU sustainable finance package
- Benefit from the valuable expertise of the legal and implementation teams from Arendt and LuxSE
- · Learn through concrete case studies on disclosures implementation, and
- Understand how the market is adapting to the evolution of the sustainable finance disclosure regime

Content

- Introduction: Context, the EU Action Plan and its various pieces
- The EU Taxonomy
 - What it is and how does it work? (incl. practical examples and case studies)
 - Impact on various financial market participants (incl. practical examples and case studies of how to calculate the various KPIs for the various financial market participants)
 - Current state of the market and of EU Taxonomy reporting and data (incl. practical examples from companies report and existing data
 - MiFID, SFDR, EU GBS
- · CSRD and non-financial reporting
 - From NFRD to CSRD
 - The European Sustainability Reporting Standards (ESRS) and international context
 - Article 8 EU Taxonomy case studies and insights on the first reports produced in 2022/2023
- Capital Markets
 - Case studies
 - EU GBS case studies

This is **not an introductory session** and pre-knowledge of the EU Taxonomy framework is strongly recommended.
