

Valérian de Jamblinne

Introduction

Valérian de Jamblinne is a Manager in the ESG services practice of Arendt Regulatory & Consulting.

Valérian started his career at ARC in 2020. He advises clients (in particular asset managers and banks) in their strategic decision-making, from defining ESG priorities to the practical implementation of sustainable investment strategies. He also advises clients on preparing sustainability-related disclosures and the integration of sustainability risks in internal processes. Furthermore, he is also experienced in training, having led numerous training courses and workshops on a wide range of topics surrounding sustainable finance.

Education

- December 2020 - Completed the CFA Level I.
- 2018-2020 - Double Master's in Advanced Finance from ICHEC Brussels Management School and Louvain School of Management. His thesis was focused on studying the link between financial performance and the integration of ESG strategies.

Previous experience

Before working at ARC, Valérian worked in the investment research department of a private bank, which involved a wide range of responsibilities, including following and summarising key news events to provide information to clients and carrying cross-asset sector studies to determine new investment themes.
